STAT

MEMORANDUM FOR: Rear Admiral Thomas A. Brooks, USN
Director of Naval Intelligence

SUBJECT: Congressionally Directed Action from House Appropriations
Committee

REFERENCE: Classified Annex to the House Appropriations Committee
Report on the FY 1989 DoD Appropriation Bill, BYE 1588-88/1
dated 22 June 1988 [redacted]

STAT

1. The House Appropriations Committee in its classified report on the FY 1989 budget, included a number of requests for actions to be undertaken by Community elements in response to specific Congressional concerns. Listed below is an action assigned to your office.

Pages 34-36 Submarine/ASW Net Assessment

The Committee directs the development of a Submarine/ASW net assessment, as described in the Committee's unclassified report on Page 161 (copy attached).

A non-special access executive summary would also be appreciated by the Committee.

2. This work usefully should be connected with the existing, ongoing work at CIA on ASW subjects, which also was Congressionally directed several years ago. My understanding is that you and CIA's Director of the Office of Science and Weapons Research have had a fruitful, ongoing exchange about their work.

3. Moreover, in light of the general position the DCI and DDCI have taken that military global net assessment-type work should not be done unilaterally by US intelligence, but rather in conjunction with DoD components, I believe we would agree that it would be useful to conduct this net assessment in conjunction with appropriate Navy operating elements. My understanding is that this type of interaction has been occurring successfully already.

STAT

SUBJECT: Congressionally Directed Action from House Appropriations Committee

4. Please note that the DCI is directed to personally review this assessment, therefore, please forward your response to me so that this request can be satisfied.

5. The Intelligence Community Staff's GDIP Program Monitor, [redacted] should be kept apprised of the efforts as they evolve. If any questions arise, [redacted] Acting Chief of the Legislative Liaison Staff, can be reached at [redacted]

2d Session

HOUSE OF REPRESENTATIVES

REPORT
100-681

**DEPARTMENT OF DEFENSE
APPROPRIATIONS BILL, 1989**

**REPORT
OF THE
COMMITTEE ON APPROPRIATIONS**

[To accompany H.R. 4781]

JUNE 10, 1988.—Committed to the Committee of the Whole House on the State of the Union and ordered to be printed

U.S. GOVERNMENT PRINTING OFFICE
WASHINGTON : 1988

86-009

NATIONAL CENTER FOR PHYSICAL ACOUSTICS

The Navy assisted in the planning and equipping of the National Center for Physical Acoustics and funds have been included this year to continue the close involvement of the Navy in the planning, organization and use of the Center.

The Committee is convinced of the need for the involvement of the Acoustics Center, for which funds were provided in fiscal years 1987 and 1988, and the necessity for it to be fully utilized in order for the Navy to more fully develop its acoustics research capability, which is essential from a national defense standpoint. The Committee on Appropriations is to be kept fully informed on the progress of the National Center for Physical Acoustics. To accomplish these objectives, the Committee directs that \$1,000,000 of the amount provided for RDT&E, Navy be made available for personnel and other expenses for the Institute for Technology Development, as a grant, for the National Center for Physical Acoustics.

ASW MASTER PLAN

The Navy has submitted an ASW Master Plan in fiscal years 1987 and 1988 at the direction of Congress. It was intended that this plan be updated and resubmitted annually. However, given the relatively low value of the current plan for its intended purpose of Congressional oversight, the Navy is relieved of any requirement to submit an ASW Master Plan during fiscal year 1989.

SUBMARINE/ANTISUBMARINE WARFARE NET ASSESSMENT

The Committee directs the development and submission of a net assessment of U.S. and Soviet submarine and antisubmarine warfare forces in the year 2000. The assessment should consider separately the projected threat and the technologically feasible threat to U.S. forces in that time period, and should be of sufficient detail for the reader to determine critical assumptions behind the analyses.

The assessment should be coordinated and led by the Director of Naval Intelligence, with input from other members of the Intelligence Community. Mediation of disagreements should be through the Director of Central Intelligence. The report is to be submitted with the fiscal year 1990 budget request. Additional discussion of this issue is contained in the classified annex to this report.

SYSTEMS SUPPORT TECHNOLOGY

ADVANCED METALLURGY RESEARCH

The Committee has added \$3,000,000 to the Systems Support Technology request of \$57,474,000, specifically for the Advanced
